

Information + Instructions

Bald Caps Art.: 500009- 500012

KERLING is offers 4 different types of bald caps:

Neutral (transparent) - in thin or normal (universal)
Dyed (skin-colour)- in thin or normal (universal)

Safety Precautions:

Always store in a dark place – protect from over-heating.

Usage:

For creating bald heads or as protection before taking plaster or silicone casts.

When glueing, please use our **SPECIAL GLUE Ki**, the Kerling "Max-Kleber" or Mastix.

Tips and tricks:

Glue on the bald cap leaving a small edge free. This edge can be trimmed with a cotton bud dipped in acetone. The acetone will dissolve the edge leaving no demarcation line.

Careful: The use of acetone on the skin is at your own risk.

Cleansing:

We recommend **PROSSAR Ki** to cleanse the skin and to clean the bald cap for re-using.

We can process special orders at any time.

Our specialist Florian Schmidt-André will gladly provide further advice on usage at any time.
