

Information + Instructions

PROSMAS^TER Ki

Art.: 500004 - 500006

Usage:

For creating realistic face and mask pieces, for blocking out eyebrows and unwanted facial hair growth and for blocking out hair to create a tonsure.

Characteristic: Visco-elastic

Important: Can be used directly on the hair

Safety precautions:

In order to avoid burning, please check the temperature of the **PROSMAS^TER Ki** before applying directly to the skin.

Procedure:

Heat over hot water (in a baby bottle warmer) or in the microwave. Our silicone thickener can be used to thicken or harden.

Ratio for reduction: one cube **PROSMAS^TER Ki** to one pinch of baking powder.

To process: heat the **PROSMAS^TER Ki**, mix in the baking powder and re-heat. The mixture should immediately begin to foam.

N.B.: once you have added baking powder, re-usage is limited.

Important: DO NOT boil **PROSMAS^TER Ki**.

Tips and Tricks:

e.g. Wounds, scars and eye pounces:

Heat **PROSMAS^TER Ki** and apply with spatula or brush.

e.g. Facial appliances:

Coat plaster mould with separating agent. Pour fluid **PROSMAS^TER Ki** carefully into the negative mould. Gently press the positive mould into the negative mould. Remove after approximately 30-50 minutes (depending on amount used). A brush dipped in ISO will allow easy removal. Dust appliances with powder for better storage.

Glue the **PROSMAS^TER Ki** appliance in position with our **SPECIAL ADHESIVE Ki**. To blend and finish the edges, use our specially developed Hamamelis-water.

To colour, use water-based make-up or pigment. To make-up, use **KERLING SEF-Colours**, water-based make-up or any other make-up.

Cleansing:

Ingenious: Peel-off large pieces and wash off the remains with warm water and soap or **PROSSAR Ki**.
