

Information + Instructions

Modelling Mass “Super Sculpey“

Usage:

A modelling material for universal use. The only modelling material which enables the taking of direct silicone impressions. Can be hardened in the oven.

Colour: pale colour

Safety Precaution:

Not suitable for children under 8 years.

Procedure:

Wash your hands and ensure that work-surface is clean. Knead the required amount until it is soft and supple.

Harden on heat-resistant glass at 130°C (275°F) for 15 minutes per 6 mm (1/4 Inch). The baking time may have to be extended for especially thick pieces.

Important: Do not bake in the microwave. To preserve the modelling mass, store in a cool place, protect from heat and direct sunlight.

Tips and tricks:

Smooth surfaces should be lightly greased to increase adhesion. It is not necessary to lubricate before making a silicone impression.

Cleansing:

Remains of modelling material should be removed from plaster models with brush and water. Hands can be cleaned with soap and water.

Our specialist Florian Schmidt-André will gladly provide further advice on usage at any time.
